Bachelor of Science in Computer Science

STI College

2024-2025

Bachelor of Computer Science

Relevant Coursework: System Analysis and Design, Database Management, Web Development, Data Communication and Networking, Thesis Writing

CERTIFICATIONS

TESDA National Certificate II (NC II) in Computer Systems Servicing - Issued May 30, 2023; Valid until May 29, 2028

EXPERIENCE

Volunteer Front End Developer, PLWM - Manila Central Church

Jan 2026 - Present

- Develop and maintain a custom church management system supporting member records, events, attendance, content, and administrative workflows.
- Prepare user-friendly pages, forms, and navigation flows to improve record handling and day-to-day coordination for church staff and leaders.
- Coordinate with team members to test features, document issues, organize updates, and support deployment of the live system.

SELECTED PROJECTS AND ACTIVITIES

PLWM Church Management System - Volunteer developer for a deployed organizational system used to support records, events, roles, and internal workflows.

Scholarship Recommendation System - Academic system for organizing student profiles and scholarship information to support clearer scholarship matching and decision review.

Student Information and Services Portal - Student service portal concept for academic records, requests, announcements, and advisory support.

AuraHub - Mobile application project focused on music playback, mood-based visual design, playlists, downloads, and authentication features.
