SUMMARY

Web development intern candidate and 3rd-year Computer Science student with hands-on experience building React-based web applications, CMS interfaces, academic systems, and deployed projects. Interested in frontend development, API integration, database-backed systems, and practical software development workflows.

EDUCATION

Regis Marie College Bachelor of Science in Computer Science	Expected Oct 2026
STI College Bachelor of Computer Science	Finished 2025

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, React Router, Tailwind CSS, Responsive UI
Backend/API: Node.js, Express, Axios, React Query, JWT authentication, REST API integration
Database: SQL, MySQL-compatible TiDB, Supabase PostgreSQL, Sequelize, Prisma
Tools/Deployment: Git, GitHub, Vercel, Render, TiDB Cloud, VS Code, Visual Studio
Other Programming: Java, VB.NET, Dart, Flutter, C++

EXPERIENCE

Front End Developer (Volunteer), PLWM - Manila Central Church cms-mcc.vercel.app	Jan 2026 - Present
- Developed a deployed church management system from scratch using React, React Router, Node.js, Express, Sequelize, TiDB Cloud, and JWT authentication. - Built responsive interface flows for church administration, member-related records, and role-based CMS workflows. - Integrated frontend features with backend APIs using Axios, React Query, React Hook Form, and React Hot Toast. - Supported deployment across Vercel, Render, and TiDB Cloud while applying security-related tooling such as bcrypt, Helmet, CORS, rate limiting, and request logging.	

SELECTED PROJECTS

Scholarship Recommendation System (SRS) Next.js, React, Tailwind CSS, Node.js, Express, Supabase PostgreSQL, Prisma	srs-frontend-mu.vercel.app
Developed an explainable scholarship recommendation system with student profiles, scholarship criteria, role-based access, and deployed web access.	
Student Information and Services Portal (SISP) Next.js, TypeScript, Tailwind CSS, NestJS, FastAPI, PostgreSQL, pgvector	sisp-theta.vercel.app
Built a student portal concept with academic services and an advisory chatbot architecture for school-related student support.	
AuraHub Flutter, Dart, Firebase Auth, just_audio	github.com/Lester0961/AURA-HUB
Created a mood-based music app concept with adaptive visual themes, playback features, authentication, and admin song management.
